ESP - STANDBY POWER - The maximum power available during a variable power sequence in which a Prime Power Diesel Generator is capable of delivering in the event of power outages or under test conditions.

PRP - PRIME POWER - The maximum power that the Prime Power Diesel Generator will be able to deliver continuously. Average load should be circa 70%. The generator can have overloaded by 10% for 1 hour per 12 hours.

Prime Power standard specification includes alternators from stock that are randomly allocated based on the physical specification required. Specific reference can be made to non-physical attributes such as country of origin, date of manufacture, warranty length and or other attributes that may be important to you or your customer at the point of order and these requests may incur mandatory additional costs in line with our cost of providing these attributes.

Control Panel Overview

All standard Prime Power Diesel Generators come complete with a Deep Sea Electronics DSE7320mkII control panel.

The UK made DSE7320(ii) control panel gives outstanding monitoring and is loaded with features.

Weights, Dimensions and Canopy Specifications

- All Prime Power Bases and Canopy Panels are made in the UK in the Prime Power Factory.
- Easily moved via forklift.
- Intergrated silencer built into the base.
- Built in fuel tank with large 480L capacity.
- Bases are constructed from 4mm Mild Steel, finished with a textured black powder coat. (RAL9005)
- Designed for air flow suitable for tropical climates with Tropical Radiator as standard.
- Canopy Panels made from 2mm zinc coated mild steel and finished with a clean white powder coat finish. (RAL9910).
- Fully lockable canopy
- Security bolts to prevent unauthorised access.
- Emergency Stop Button as standard
- High quality adjustable handles.
- Large removable doors for excellent access.
- Black Zinc die cast hinges on doors, tested and proven to withstand extremely corrosive conditions.
